Softgoods at Bedside

TrippNT

Increasing Efficiency in the Plasma Industry

Lean out the flow and delivery of Softgoods from the Critical Supply Room to the Donor Bed with HEMOBILIZE System for more donor turns, increased ROI, reduced touch points and streamlined facility structures.

SG ACCESS CART™

Softgoods storage is integrated with the Donor Bed

SG SUPPLY CART™

Softgoods & Ancillary Supply Storage with an Integrated Equipment Stand

SG TRANSPORT CART™

Replenish your bedside storage with a one-piece-flow system

- Quality

The SG Access Cart, SG Supply Cart, and the SG Transport Cart are all manufactured using Hospital Grade materials and backed by a LIFETIME Warranty.

- Design

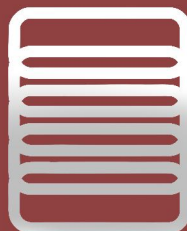

Eliminate excess donor floor space, cabinets, cupboards, and cubby holes used to stock Softgoods.

- Profit

Increased donor turns through improved operational efficiency creates higher income at lower costs.

- Control/Safety

Leaning out the flow of Softgood replenishment increases system control and safety. A reduction in "touches" by staff minimizes potential for damage and transmission of infectious agents.
